

A Few Drops of CARBONOL

Carbonol is wonderful both as a disinfectant and a grease solvent. Both of these properties are very useful in house-cleaning.

When you mop a floor with water containing Carbonol, you know that you have destroyed every germ on that floor and that the floor is as clean as a hospital.

The grease dissolving power of Carbonol has removed old stains which you did not think could be removed, and the floor looks better than you were ever able to make it look with just plain soap and water.
